In partnership with the University of Toledo's Center for Creative Instruction, McGraw Hill launched the first-of-its-kind virtual dissection tool in 1997: Anatomy & Physiology Revealed® (APR). APR utilizes cadaver photography to provide students with a realistic experience and the ability to practice and understand dissection 24/7—without the physical resources of a cadaver.

Hypernatremia is a common electrolyte problem that is defined as a rise in serum sodium concentration to a value exceeding 145 mmol/L. [1, 2, 3] It is strictly defined as a hyperosmolar condition caused by a decrease in total body water (TBW) [] relative to electrolyte content. Hypernatremia is a "water problem," not a problem of sodium homeostasis.

[Hypernatremia: Practice Essentials, Pathophysiology, Etiology](#)

Adolescence (from Latin adolescere 'to grow up') is a transitional stage of physical and psychological development that generally occurs during the period from puberty to legal adulthood (age of majority). Adolescence is usually associated with the teenage years, but its physical, psychological or cultural expressions may begin earlier and end later. For example, puberty now typically begins ...
