Dark matter could be white dwarfs, the remnants of cores of dead small- to medium-size stars. Or dark matter could be neutron stars or black holes, the remnants of large stars after they explode. The Fermi Gamma-Ray Space Telescope can detect high-energy gamma rays that may be emitted when dark matter particles collide.

Dark matter is a hypothetical form of matter thought to account for approximately 85% of the matter in the universe. Its presence is implied in a variety of astrophysical observations, including gravitational effects that cannot be explained by accepted theories of gravity unless more matter is present than can be seen. For this reason, most experts think that dark matter is abundant in the ...

What is dark energy? More is unknown than is known – we know how much there is, and we know some of its properties; other than that, dark energy is a mystery – but an important one. Roughly 70% of the Universe is made of dark energy. Dark matter makes up about 25%. The rest – everything on Earth, everything ever observed with all of our instruments, all normal matter adds up to less than 5 ...

Dark matter. Unlike normal matter, dark matter does not interact with the electromagnetic force. This means it does not absorb, reflect or emit light, making it extremely hard to spot. In fact, researchers have been able to infer the existence of dark matter only from the gravitational effect it seems to have on visible matter.

Most scientists think that dark matter is composed of non-baryonic matter. The lead candidate, WIMPS (weakly interacting massive particles), have ten to a hundred times the mass of a proton, but ...

[What is Dark Matter? | Space](#)

dark matter, a component of the universe whose presence is discerned from its gravitational attraction rather than its luminosity. Dark matter makes up 30.1 percent of the matter –energy composition of the universe; the rest is dark energy (69.4 percent) and “ordinary” visible matter (0.5 percent).

[dark matter | Definition & Facts | Britannica](#)

DARK MATTER ist ein Parallelkosmos aus raumgreifenden Lichtinstallationen in dem die Grenzen zwischen realer und digitaler Welt verschwimmen. In den pechscharzen Räumen eines ehemaligen Fabrikgeländes begibt sich der Besucher auf eine Reise durch sieben teilweise interaktive Werke.
