Technology is transforming the landscape of corporate America. The average lifespan of an S&P 500 company is now less than 20 years—down from 60 years in the 1950s, according to Credit Suisse. For business to thrive in the digital era, we must disrupt ourselves and replace our current business model with a new ecosystem. We must cultivate an

Parents need to know that Tomorrow's Hope is a documentary short that examines the success of Educare, a bold early childhood education program for children from underserved communities. Originally called "The Beethoven Project," Educare opened inside a government housing project in Chicago's South Side, pairing free daycare with social services and implementing a model of whole-family learning.

It is 2050. The world has successfully made the transition to a zero-carbon economy, and climate catastrophe has been averted. Steel and other energy-intensive industries run on the planet's second most important source of power: green hydrogen, an almost magically clean fuel made by electrolysing water using renewable electricity to separate out the hydrogen atoms.
