A Absolute electrode potential In electrochemistry, according to an IUPAC definition, is the electrode potential of a metal measured with respect to a universal reference system (without any additional metal–solution interface). Absolute pressure is zero-referenced against a perfect vacuum, using an absolute scale, so it is equal to gauge pressure plus atmospheric pressure.

EX: in the solution to one problem, the book got the final answer by dividing a value with a number that was 10^6 off from the correct value! While it showed the correct final answer, it took me 20 minutes starting at the solution to figure out what went wrong. Overall I still recommend this book, but beware of these typos throughout the book.
