Monocular deprivation early in development causes amblyopia, a severe visual impairment. Prognosis is poor if therapy is initiated after an early critical period. However, clinical observations have shown that recovery from amblyopia can occur later in life when the non-deprived (fellow) eye is removed. The traditional interpretation of this finding is that vision is improved by relieving ...

Following the Norman Conquest in 1066 all the land of England was technically owned by the Crown. Under the feudal manorial system which subsequently developed, the Crown made grants of land to earls and barons who in turn granted smaller areas to knights in return for the provision of a set period of active military service in the field called ' knight service ' .
