I have the same of question. After I setup the Windows server 2019 guset OS on the Windows server 2012 R2 hyper-V. It seem to work. But on the SCVMM 2012R2. The VM status will show as "unsupported VM configuration". Should I downgrade to the WIndows server 2016 guest OS or upgrade the SCVMM? Thanks! I'd start a new thread detailing your issues.

Hi, A few days ago one of the programs installed on our 2008R2 server has "disappeared", as if it was uninstalled. I've searched through the event viewer for anything related but found nothing. I would like to find out if any one (and which user) has uninstalled the program. Where can I find ... · It depends on the application. You should see the ...
