Things can fly quite happily without engines, as gliders (planes with no engines), paper planes, and indeed gliding birds readily show us. Photo: Four forces act on a plane in flight. When the plane flies horizontally at a steady speed, lift from the wings exactly balances the plane's weight and the

Air-to-ground rockets were in service before the war in several nations such as the Soviet Union but their use was limited. The Il-2 Stormovik and other Russian planes made devastating attacks against German armor and supply columns. In the west, fighter-bombers such as the American P-47 and the British Typhoon fired thousands of rockets at ...
