Robert Glusic/Getty Images. Starches and sugars, the foods that plants make and store for their own growth, are also the fundamental nutrients that humans and other organisms need in order to live. In North America the chief food plants are cereal grains. (The word cereal comes from Ceres, the Roman goddess of agriculture.) Major cereal crops include corn (maize), wheat, oats, rice, barley ...

Betalain pigments occur only in the Caryophyllales and some Basidiomycota (mushrooms), for instance Hygrophoraceae (). Where they occur in plants, they sometimes coexist with anthoxanthins (yellow to orange flavonoids), but never occur in plant species with anthocyanins.. Among the flowering plant order Caryophyllales, most members produce betalains and lack anthocyanins.

Regulan procesos de correlación, es decir que, recibido el estímulo en un órgano, lo amplifican, traducen y generan una respuesta en otra parte de la planta. Interactúan entre ellas por distintos mecanismos: Sinergismo: la acción de una determinada sustancia se ve favorecida por la presencia de otra.; Antagonismo: la presencia de una sustancia evita la acción de otra.
