The test case, that of sklêrotês, is one where the score is even, so that convention has to be called in to break the deadlock. And as regards the argument about numbers, Socrates is explicit that convention needs to be invoked here, not to replace naturalism, but on the contrary to vindicate it: '[W]here do you think you're going to get ...

Even young teachers who got such and such high score on some test can't speak a word of English if I approach them. I think studying for scores only is a problem back home, but at least I feel like students are given far more of an opportunity to think about what they're doing, rather than read and recite over and over again.
