1 The image of the cave illustrates by another proportion the contrast between the world of sense-perception and the world of thought. Instead of going above the plane of ordinary experience for the other two members of the proportion, Plato here goes below and invents a fire and shadows cast from it on the walls of a cave to correspond to the sun and the " real " objects of sense.

They might exist, but lie outside of the scope of scientific investigation. Some authors (e.g., Rosenberg 2014) hold that taking the results of science seriously entails negative answers to such persistent questions as free will or moral knowledge. However, these stronger conclusions are controversial.

Plato and Aristotle both held that philosophy begins in wonder, by which they meant puzzlement or perplexity, and many philosophers after them have agreed. Ludwig Wittgenstein considered the aim of philosophy to be " to show the fly the way out of the fly bottle " —to liberate ourselves from the puzzles and paradoxes created by our own ...
