Geometry (from the Ancient Greek: γεωμετρία; geo-"earth", -metron "measurement") is, with arithmetic, one of the oldest branches of mathematics.It is concerned with properties of space that are related with distance, shape, size, and relative position of figures. A mathematician who works in the field of geometry is called a geometer.. Until the 19th century, geometry was almost ...

In geometry, a simplex (plural: simplexes or simplices) is a generalization of the notion of a triangle or tetrahedron to arbitrary dimensions.The simplex is so-named because it represents the simplest possible polytope in any given space.. For example, a 0-simplex is a point,; a 1-simplex is a line segment,; a 2-simplex is a triangle,; a 3-simplex is a tetrahedron,
