As with all hyper-performance magnum cartridges, the 26 Nosler can be a little more exacting to reload than less over-bored rounds. That said, the reward can be much greater if you take the time to really dial in the optimum load for your rifle. Powders with slow burn rate and high load densities will work best.

Hard cast bullets can be formulated of numerous alloy mixes (antimony, silver, tin, etc) containing some lead, but the alloys make the bullets much harder than pure lead. Pure lead has a Brinell hardness # of about 4. Most hard cast bullets will have a Brinell hardness # of 11 to 12 and as such are several times harder than lead.
