So we'd both be there yelling at each other and not meaning to, but it was the only way we could hear what the other was saying. And then there was my pronounced inability to recognize people in masks. People somehow knew me, though, and would brush by with "Oh hi, Kathy," and then I'd be wondering for days just who that was ...

The human voice consists of sound made by a human being using the vocal tract, including talking, singing, laughing, crying, screaming, shouting, or yelling. The human voice frequency is specifically a part of human sound production in which the vocal folds (vocal cords) are the primary sound source. (Other sound production mechanisms produced from the same general area of the body involve the ...
